CHARLES GOODMAN
EXAMINER

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record do not anticipate nor do they render obvious the automatic positioning system as claimed in claims 1 and 13. The closest prior art, Dobeck (US 4,901,992), discloses a stock stop comprising many of the elements claimed including, inter alia, a rail structure (22); a carriage assembly (54); and at least two linkage structures (41, 43). See whole patent. It is noted that Dobeck's stop may be utilized in a variety of devices including saws. Note, e.g., c. 1, ll. 5-20. However, Dobeck lacks the first and second sheet members sandwiched in parallel to each other as claimed to the extent that Dobeck does not teach or suggest the specific arrangement between the claimed rail, rail structure and guide track as claimed. In Dobeck, the rail (22) is read on the claimed "rail structure" and rail assembly (20) is read on the claimed "guide track." In line with this reading, the plates (42, 43) are construed to read on the claimed "linkage structure"; thus, the plate (42) is attached to the rail structure while the plate (43) is attached to the guide track simply by its connection to the rail assembly vis-à-vis intermediate means. However, these two plate are perpendicular to each other and cannot anticipate the relevant limitations of "sandwiched" and "in parallel" to each other as claimed. The above reasoning applies to claim 1. With respect to claim 13, Dobeck does not teach or suggest the linkage structure further comprising a third sheet member as claimed in combination with most of the limitations of claim 1. Moreover, none of the other prior art of record fairly teach or suggest these lacking features. Thus, it is believed that the claimed inventions with the lacking features in combination with all the other claimed limitations are allowable over the prior art of record.
